

HECKLER & KOCH

HK45

HK45 SERIES .45 ACP

HK45 FEATURES

Three dot night sights on LE versions

All HK pistol slides are high strength steel with carbon-nitride "hostile environment" corrosion-resistant finish.

An improved USP-style control lever, a combination safety and decocking lever, has a positive stop and returns to the "fire" position after decocking.

Amidextrous controls include enlarged paddle magazine release and dual slide releases.

10-round steel magazine with polymer floorplate

HK45 V1 DA/SA

MODULAR BACKSTRAPS
 HK45s come standard with an extra backstrap; medium and small interchangeable backstraps ensure an optimal fit for most shooter's hands.

A product improvement on the legendary USP, the HK45 series, builds on the inherent safety and reliability with increased accuracy through its o-ring fitted, cold hammer forged barrel. Ergonomics are improved with fully ambidextrous controls, a more contoured slide and frame and the ability to fit the pistol to the shooter with adjustable backstraps.

Available in both full size and compact models and a range of trigger variants, including traditional double action/single action, single action only and HK's enhanced double action only, the Law Enforcement Modification (LEM) variant. Whichever model you select, you'll be confident that you have the most capable of .45 ACP semi-auto handguns for decades of hard use.

Choice of conventional double action/single action (with manual safe & decocking), enhanced double action only (LEM), and decock only

8-round magazine with a finger grip floorplate. 10-round magazines for HK45/HK45 Tactical also fit.

HK45 Compact models are functionally identical to the full-size HK45 with a shorter barrel/slide and a shorter grip.

HK45 Series Tactical models (HK45 Compact Tactical & HK45 Tactical) have threaded O-ring barrels.

10-round magazine with extended floorplate and sleeve is standard on the HK45 Compact Tactical.

HK45 Tactical models come with high profile sights (with a tritium front dot).

All HK pistols with threaded barrels come standard with thread protectors

HK45 Tactical Thread Pitch - 16 x 1 Left Hand

HK45 pistols feature the patented HK Lock-Out Safety Device. It locks the handgun's action by blocking any movement of the hammer strut and slide.
